Subject Index

Acoustic reflex 421
–, latency of the 464
– threshold 126
Acoustic trauma 320
Acquired deafness 335
Action potential 277
Action potentials (AP), cochlear 1, 391
Adaptation, auditory 1, 147
Additivity of various hearing losses 93
AER, early components of the 23, 195, 379
–, late 366
Air-conduction audiometry 112
Amplification systems, induction loop 78
Amplitude of individual waves of response 458
Amplitudes, P_1–N_1, N_1–P_2 162
Antiphasic condition, homophasic versus 428
Arabic 212
Artificial mastoid 205
Attenuation, interaural 112
Audiological organisation in Greenland 408
Audiometers, extra-high frequency 470
Audiometry 33
–, air-conduction 112
–, bone-conduction 112
–, brief-tone 311
–, electric response (ERA) 23, 33, 162, 195, 342, 349, 357, 366, 379, 391, 403, 447, 458
–, electroencephalic (EEA) 23, 379
–, evoked response (ERA) 181, 342, 349, 403
–, modifications of speech audiometry 66
–, objective 421
–, pure-tone 326
–, shiver 302
–, speech 212, 485
Auditory adaptation 1, 147
Auditory discrimination 66
Auditory discrimination ability 490
Auditory evoked potential (AEP) 195, 357
Auditory evoked responses (AER) 33, 391
Auditory fatigue 195
Auditory function, development of 66
Auditory genetics 335
Auditory masking 1, 112, 147, 236, 349, 428, 485
Autogenous bone columella 414
Autograft 437
Automatic scoring in ERA 181
Automatic tympanometry 126
Autosomal dominant deafness 335
Autosomal recessive deafness 335
Averaged electroencephalic response (AER) 23, 195, 379
Averaged electroencephalic response (AER), early 366

Békésy excursion size 260
Bell's palsy 231
Binaural interaction 260
Binaural listening 432
Binaural stimuli, monaural and 195
Bone-conduction audiometry 112
Bone-conduction calibration 205
Bone-conduction standards 205
Brain potentials 458
Brainstem lesions 260
Brief-tone audiometry 311

Calibration, bone-conduction 205
Cat, hearing thresholds of the 432
Cats, sound-conditioned 437
Central auditory dysfunction 260
Chemical sympathectomy 290
Childhood deafness 335
Children, deaf 33
–, detection of hearing impairment in 33
–, handicapped 33
–, mentally retarded 66, 501
Classification, computerized 326
Click stimulation 23, 379, 391
Cochlear action potentials (AP) 1, 391
Cochlear injury 231
Cochlear microphonic 277
Cochlear physiology 277
Cochleas, diagnosis of abnormal 1

Columella, autogenous bone 414
Computerized classification 326
Conductive hearing loss 126, 414, 428
Contingent negative variation (CNV) 447
Correlation score in ERA 181
Cortical evoked potentials 162
Critical band width 421
Critical bands 236
Cross-hearing 349

Data processing 403
Deaf children 33
Deafness, acquired 335
–, autosomal dominant 335
–, autosomal recessive 335
–, epidemiology of 335
Detection of hearing impairment in children 33
Development of auditory function 66
Diagnosis of abnormal cochleas 1
Difference limen, intensity 260
Discrimination ability, auditory 490
Discrimination, auditory 66
Distorted speech test 66
Disruption of the ossicular chain 126
Double exposures to pure tones 320

Early averaged electroencephalic response (AER) 366
Early components of the AER 23, 195, 379
EEA during sleep 379
EEA, sedatives for 379
EEG 33
Electric response audiometry (ERA) 23, 33, 162, 195, 342, 349, 357, 366, 379, 391, 403, 447, 458
Electroacoustic measurements 78
Electrocochleography (ECoG) 1, 391, 403
Electrode recording, multiple 195
Electroencephalic audiometry (EEA) 23, 379
Energy principle 93
Epidemiology of deafness 335

ERA, automatic scoring in 181
–, correlation score in 181
–, errors in 181
–, masking in 349
–, rank correlation in 181
–, template in 181
Errors in ERA 181
Evoked response audiometry (ERA) 181, 342, 349, 403
Evoked response patterns 458
Exposures to pure tones, double 320
Extra-high frequency audiometers 470
Extra-high frequency hearing loss 470

Facilitatory and inhibitory phenomena 391
Fatigue, auditory 231
Formation of loudness 421
Free-field listening 432
Frequency-modulated tones 162

Genetics, auditory 335
Greenland, audiological organisation in 408
–, a remote area 408
Guinea pig 147, 302, 320

Habituation 501
Hair cell neuron synaps 147
Handicapped children 33
Hearing aids 78, 485, 490
Hearing aid deposits 408
Hearing-aid-processed stimuli 490
Hearing diseases and diagnoses 408
Hearing impairment in children, detection of 33
Hearing loss, conductive 126, 414, 428
–, extra-high frequency 470
–, noise-induced 93, 326
–, sensorineural 236, 349, 428, 464
–, surgery for 414
–, vascular-related 470
Hearing losses, additivity of various 93
Hearing screening, neonatal 495
Hearing thresholds of the cat 432
High-frequency audiometric thresholds 470
Homophasic versus antiphasic condition 428

6-Hydroxydopamine 290
Hyperlipidemia 470

Impedance of the ear, relative 126
Impedance measurement 464
Induction loop amplification systems 78
Inhibitory phenomena, facilitatory and 391
Inner and outer sensory cell function 277
Insert receivers 112
Intelligibility of distorted speech 66
Intensity difference limen 260
Intensity-modulated tone 391
Interaural attenuation 112
Interaural phase 357
Intoxication, Kanamycin 277
Intra-aural reflex 421

Kanamycin intoxication 277

Late AER 366
Latencies, P_1, N_1, P_2 162
Latency of the acoustic reflex 464
Latency of evoked response 458
Loudness 357
– calculation 421
–, formation of 421
– recruitment 1, 342

Machine scoring, use of 33
Masking, auditory 1, 112, 147, 236, 349, 428, 485
Masking in ERA 349
Masking level difference (MLD) 357, 428
Masking pattern 236
Mechanical coupler 205
Menière's disease 428
Mentally retarded children 66, 501
Microphone input 78
Minimum audible field curve for man 432
Minimum audible field curve for the cat 432
Modifications of speech audiometry 66
Monaural and binaural stimuli 195
Morphology 302
Multiple electrode recording 195

Neonatal hearing screening 495
Neonates, response of 495
Neuron synaps, hair cell 147
Noise exposure 231
Noise-induced hearing loss 93, 326
Noise trauma 326
Nonspecific evoked cerebral potential (NECP) 447

Objective audiometry 421
Objective scoring procedures 379
Ossicular chain, disruption of the 126
Ossicular chain, reconstruction of 414
Ossiculoplasty 414, 437
Otosclerosis 126
Ototoxicity 302
–, salicylate 311
Outer sensory cell function, inner and 277

P_1-N_1, N_1–P_2 amplitudes 162
P_1, N_1, P_2 peak latencies 162
Perception 447
Permanent threshold shift (PTS) 93
Phase, interaural 357
Physiology, cochlear 277
–, sensory 147
Presbyacusis 93
Probe-tone frequency, selection of the 126
Problems of audiological treatment 408
Psychoacoustics of white noise 140
Psychogalvanic reflexes (PGR) 501
Pure-tone audiometry 326
Pure tones, double exposures to 320

Quasi-simultaneous stimulation 342

Rank correlation in ERA 181
Rapid eye movement sleep 23
Rat 290
Reconstruction of ossicular chain 414
Recruitment, loudness 1, 342
Reflex, acoustic 421
–, intra-aural 421
–, latency of the acoustic 464
–, stapedial muscle 464
Reflex threshold, acoustic 126

Reflexes, psychogalvanic (PGR) 501
Refractoriness 147
Relative impedance of the ear 126
Response of neonates 495

Salicylate ototoxicity 311
Scoring in ERA, automatic 181
Scoring procedures, objective 379
Scrambling technique 342
Sedatives for EEA 379
Selection of the probe-tone frequency 126
Sensorineural hearing loss 236, 349, 428, 464
Sensory cell function, inner and outer 277
Sensory physiology 147
Shiver audiometry 302
Sleep, EEA during 379
–, rapid eye movement 23
Sleep stages 458
Sound-conditioned cats 437
Spectral analysis 403
Speech, intelligibility of distorted 66
Speech audiometry 212, 485
–, modifications of 66
Speech test, distorted 66
Spiral organ of Corti 290
Standards, bone-conduction 205
Stapedius muscle function 231
Stapedius muscle paralysis 231
Stapedial muscle reflex 464
Stereocilia 290
Summating potential 277
Surgery for hearing loss 414
Sympathectomy, chemical 290

Telecoil input 78
Temperature coefficients 147
Template in ERA 181
Temporal integration 311
Temporary threshold shift (TTS) 93, 231
Testing strategy 33
Threshold measures 379
Threshold shift, permanent (PTS) 93
– –, temporary (TTS) 93, 231
Thresholds, high-frequency audiometric 470
– of white noise 140
Tonal character of white noise 140
Tone bursts 391
Tone pips 379
Treatment, problems of audiological 408
Tympanograms, types of 126
Tympanometry, automatic 126
Types of tympanograms 126

Use of machine scoring 33

Vascular-related hearing loss 470

White noise 421
–, psychoacoustics of 140
–, thresholds of 140
–, tonal character of 140
